SB 1383

California's Short-Lived Climate Pollutant Reduction Strategy

When compostable materials like food scraps, paper, and plant trimmings break down in landfills, they produce methane, a potent greenhouse gas and contributor to climate change. California state law (SB 1383) will help keep compostable materials out of landfills.

In Alameda County, the Organics Reduction & Recycling Ordinance is in place to help residents and businesses comply with the regulations set by the state. This local law is implemented through a partnership between the City of San Leandro, ACI, StopWaste, and Alameda County Environmental Health Departments.
